

Talking with the Satellites

Building a Low-Cost Ground Station with SatNOGS

Mateusz „” Winiarski

KMPS UJ
biophysics, FAIS, Jagiellonian University in Kraków

SMPowisko 2025
today

satellite rise

figure: number of satellites launched yearly into LEO (low earth orbit)

can i launch a satellite?

figure: a cubesat

figure: a cubesat deployer

motivation

motivation

motivation:

- ▶ access real-time scientific data from space

motivation

motivation:

- ▶ access real-time scientific data from space
- ▶ study RF propagation and satellite orbits

motivation

motivation:

- ▶ access real-time scientific data from space
- ▶ study RF propagation and satellite orbits
- ▶ contribute to global open-source networks (SatNOGS)

listening to waves

amateur frequencies

setup

antenna

- ▶ active (upper) rod length:
$$L_a = \frac{\lambda}{4} = \frac{c}{4f} = 16.3 \text{ cm}$$
- ▶ passive (lower) rod length:
$$L_p = \frac{\lambda}{2} = \frac{c}{2f} = 34.6 \text{ cm}$$
- ▶ distance between rods:
$$d = \frac{3\lambda}{8} = \frac{3c}{8f} = 25.8 \text{ cm}$$
- ▶ interference: constructive

antenna

figure: the antenna with RTL-SDR dongle just outside the Garage's window

sdr + computer

figure: rtl-sdr dongle

figure: raspberry pi

satnogs: concept

figure: overall view of satnogs (Satellite Network Open Ground Stations) concept

satnogs network

bad results

figure: bad result – no signal

figure: also a bad result – tangent-like signal
means terrestrial noise
